

IN THE ABSTRACT:

Please amend the Abstract to read as follows:

C' A device, system and method ~~for treating a~~ provides mitral valve therapy ~~is disclosed~~. The device is implantable in the coronary sinus of the heart to partially encircle the mitral valve annulus. The device is elongated, is resilient, and has a preformed arched configuration. When the device is implanted in the coronary sinus, the device exerts a substantially radially inward force to the mitral valve to restore mitral valve annulus geometry.
